

Vungle - adapter info

Compatibility

Network	Bundle version	Third party SDK version	Fyber SDK version	Unity Engine Version
Vungle	4.0.9-r2	4.0.9	8.4.0 +	5.3.5f1

Important

- The Vungle SDK supports iOS 7 or higher.
- This version of the mediation bundle works only with the Fyber SDK 8.0 and higher.
- Application Transport Security (ATS)

Starting in iOS 9 (with builds made from Xcode 7), Application Transport Security requires all network traffic made from an app to be secured via HTTPS. You can read more about it in our [Vungle iOS 10 Transition Guide](#). Vungle iOS SDK is fully ready for the ATS change, and all traffic from the Vungle SDK will use HTTPS by January 1, 2017. Before then, we suggest setting your `NSAllowsArbitraryLoads` value to YES.

Example parameters

- **name:** `Vungle`
- **settings:**
 - **SPVungleAppId**
 - **SPVungleOrientation:** `all` | `portrait` | `landscapeLeft` | `landscapeRight` | `portraitUpsideDown` | `landscape` | `allButUpsideDown`
 - **SPVungleIncentivizedAlertTitleText:** Any string
 - **SPVungleIncentivizedAlertBodyText:** Any string
 - **SPVungleIncentivizedAlertCloseButtonText:** Any string
 - **SPVungleIncentivizedAlertContinueButtonText:** Any string

Required frameworks

- `AdSupport.framework`
- `AudioToolbox.framework`
- `AVFoundation.framework`
- `CFNetwork.framework`
- `CoreGraphics.framework`
- `CoreMedia.framework`

- `Foundation.framework`
- `libz.dylib`
- `libsqlite3.dylib`
- `MediaPlayer.framework`
- `QuartzCore.framework`
- `StoreKit.framework`
- `SystemConfiguration.framework`
- `UIKit.framework`
- `WebKit.framework` (Mark as "Optional")

Required linker flags

-ObjC

Known issues

Information from Vungle:

- When SPVungleIncentivized dialog is enabled, the video is not paused when the dialog is displayed.
