AppLovin - adapter info

Compatibililty

Network	Bundle version	Third party SDK version	Fyber SDK version	Unity Engine version
AppLovin	3.5.2-r2	3.5.2	8.4.0 +	5.5.1f1

Important

- **The AppLovin Mediation bundle (from version 3.2.2-r2) adds support for Creative Controls. Please note that this bundle is not backwards compatible with previous SDK versions, and that you need at least SDK version 8.4.0 to use this bundle.**

- **The AppLovin Mobile SDK supports iOS 6 or higher.**

Example parameters

- **name**: `AppLovin`
- **settings**:

    - **SPAppLovinSdkKey**
    - **SPAppLovinEnableVerboseLogging**: `YES` | `NO`

Required frameworks

- `AdSupport.framework`
- `AVFoundation.framework`
- `CoreGraphics.framework`
- `CoreMedia.framework`
- `CoreTelephony.framework`
- `StoreKit.framework`
- `SystemConfiguration.framework`
- `UIKit.framework`
- `WebKit (Optional)`

Required linker flags

- `-ObjC`
- `-all_load`

Known Issues

- **After an Interstitial ad has been downloaded, if there is a loss of network connection before/during the showing of the Interstitial, there is a chance this could lead to a black screen as the end card is not yet available.**
